WORK EXPERIENCE

Microsoft Research

Research Intern

Jan. 2023 - June 2023

- Led to establishing a bilingual benchmark for testing the general abilities of large language models (mainly GPT-4) in human exams. The benchmark has been acknowledged for model evaluation by companies such as Microsoft, Bytedance and SenseTime.
- Worked on building an automatic long-content generation system with GPT-4.

Industrial and Commercial Bank of China

Data Analyst Intern

June 2016 - Sept. 2016

- Assisted in building an information extraction system for letters of credit transactions. Created APIs to extract numerical data from financial and commercial documents in Python.
- Used Excel to organize and analyze commercial invoices and bills of lading.

RESEARCH INTERESTS

benchmarking and evaluation of large language models, multilingual and multi-cultural analysis, compositional generalization, knowledge-base semantic parsing, and natural language inference.
